

# QuikSip™ Bottletop Aspirator

The QuikSip™ is a convenient bottletop aspirator that removes supernatants, cell culture media, and other biological liquids from dishes, flasks, culture bottles, centrifugation tubes, multiwell plates, and more. It is small, portable, and doesn't require an external vacuum or power source.

- **Moves Easily Between Labs:** The QuikSip™ works without any external vacuum source, allowing it to be easily transferred between workstations. Each plunger stroke powers up to 25mL of aspiration.
- **Provides Fingertip Aspiration Control:** The QuikSip™ includes a unique thumb-operated controller that is compatible with disposable pipette tips, micropipettes, and glass Pasteur pipettes.
- **Adapts to Sterile Environments:** All wetted parts are autoclavable (except piston/cylinder cartridge). Sterile piston/cylinders are available for use in sterile applications.
- **Fits Most Reagent Containers:** Mounts on most common reagent bottles with its 45mm thread and included 45/33mm and 45/S40mm adapters. Other thread adapters available.
